

Vehicle Fitting Information

The infant car seat with base are classified for “Semi-universal” use. They are suitable for fixing into the seat positions of the most cars. The letters on the diagram to the below correspond with the vehicle fitting positions listed in the following pages.

Seat positions in other cars may also be suitable to accept the child restraint. If in doubt, consult either the child restraint manufacturer or the retailer.

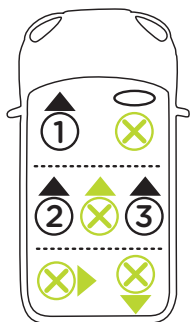

ALWAYS give priority to the rear seats of your vehicle.

DO NOT fit your child restraint onto a vehicle seat fitted with an airbag, unless it can be deactivated.

If your child restraint can be fitted, it is marked with V.

If your child restraint cannot be fitted, it is marked with X.

If your vehicle is not listed in this manual or it is not marked with either a V or X then please refer to your vehicle’s handbook or contact the manufacturer for further information.

Installation with 3-point-belt
